

# SMART *Brief*

T E C H N I C A L B U L L E T I N

**DATE:** 31 August 2009 **No:** 017- SB-01083109  
**TO:** Contractors, Distributors, Architects & Homeowners **Pg 1 of 1**  
**FROM:** Metro Technical Services Division  
**SUBJECT:** RAIN WATER RUN-OFF FROM A METRO ROOF

---

The materials incorporated in the manufacture of Metro stone-coated steel roof panels do not adversely affect the water quality draining from the roof. With that understood, Metro does not recommend collecting water from a Metro roof for the purpose of drinking. Due to the uncertainty regarding the settlement of debris on the surface of a roof, one should be extremely cautious before drinking water collected from a roof. Local water professionals should be consulted to verify acceptable contamination levels and testing of the water before drinking.
